

ABSTRACT

A gaming device is provided that may include a gaming device housing having a rotatable container coupled thereto. At least one moveable object is configured to move within the container.

5 The moveable object comprises at least one moveable object symbol. A controller is provided that is in communication with at least one controller selectable object. The controller selectable object comprises at least one controller selectable object symbol that is substantially similar in appearance to the moveable object. The controller selectable object may be displayed to the player and provide an illusion to the player that the controller selectable object is the moveable object. A game display
10 is also provided and may be in communication with the controller. The game display is configured to display a display symbol in at least one display position. A game outcome at least partially depends on the display position of the display symbol.
